

EDUCATION

Department of Biomedical Engineering, Washington University in St. Louis	St. Louis, US
Ph.D., Biomedical Engineering	05.2023(expected)
Department of Mechanical Engineering, University of Michigan	Ann Arbor, US
MS, Mechanical Engineering	05.2018
College of Energy Engineering, Zhejiang University	Hangzhou, China
BS, Energy & Environmental Systems Engineering (<i>Outstanding graduates of Zhejiang</i>)	06.2016

RESEARCH EXPERIENCES

Research Interests:

Biomedical Imaging, Optical Imaging, Computer-aided Diagnosis, Image Processing, Deep Learning

Optical and Ultrasound Imaging Lab

Advisor: Quing Zhu

2018-present	Ultrasound-guided Diffuse Optical Tomography (DOT) for Breast Cancer Imaging
<u>Thesis project</u>	<u>Tools:</u> MATLAB, Python, PyTorch, TensorFlow, scikit-learn
	<ul style="list-style-type: none"> Developed a projection-based outlier removal algorithm and a connect component analysis-based artifact removal algorithm guided with ultrasound segmentation to reduce image artifacts. Designed a multilayer-perceptron (MLP) to generate data for DOT difference imaging to simplify the data acquisition and mitigate mismatch errors. Designed a convolutional autoencoder to extract features from DOT measurements and a Random Forest classifier for real-time breast lesion classification without DOT reconstruction. (Ongoing) Developed a fusion neural network to combine DOT with US images to classify breast lesions. Involved in developing a CNN to estimate breast tissue optical properties using DOT. Involved in developing a neural network with physical constraints for DOT image reconstruction.
2018-present	Optical Coherence Tomography (OCT) for Colorectal & Ovarian Cancer Diagnosis
	<u>Tools:</u> MATLAB, Python, PyTorch, TensorFlow, Keras, scikit-learn
	<ul style="list-style-type: none"> Calculated statistical features of depth-resolved attenuation maps from OCT images for ovarian cancer diagnosis. Designed a customized ResNet to classify OCT colorectal images and achieved an AUC of 0.97. (Ongoing) Applied weakly-supervised learning to classify OCT images of colorectal polyps. Involved in developing an object detection RetinaNet for colorectal cancer diagnosis.
2018-2020	Spatial Frequency Domain Imaging (SFDI) for Colorectal Tissue Assessment
	<ul style="list-style-type: none"> Designed an AdaBoost algorithm for SFDI colorectal image classification.

Optical Imaging Laboratory

Advisor: Xueding Wang, Xinmai Yang

2017-2018	Image-guided Photo-mediated Ultrasound Therapy
	<ul style="list-style-type: none"> Simultaneously applied laser and ultrasound treat neovascularization in rabbit eyes guided by OCT & photoacoustic microscopy (PAM). Simulated bubble dynamics under simultaneous laser & ultrasound and validated the simulations with experiments on tubes filled with blood. (<u>Tool:</u> MATLAB)

AWARDS & HONORS

- 2022 Student Paper Award finalist, Optica Biophotonics Congress 2022 (top 4)
- PhD Outstanding Research Awards (3 out of BME PhD students)
- 2020 Best Poster Award at Siteman Cancer Center Research Forum (top 5)
- 2018 Rackham Graduate Student Research Grants (\$1500)
- 2017 Outstanding graduates of Zhejiang Province
- 2016 Excellent Graduation Thesis Award

National Scholarship (top 2%)

2015 National Scholarship (top 2%)

2014 Second-class Scholarship (top 11%)

PEER REVIEW ACTIVITIES

(6) Journal of Biomedical Optics

(3) International Journal of Imaging Systems & Technology

(3) Biomedical Optics Express

(2) IEEE Transactions on Biomedical Engineering

(3) Journal of Biophotonics

(1) Computer Methods and Programs in Biomedicine

(1) Optics Express

(1) Journal of Innovative Optical Health Sciences

TEACHING & OUTREACH ACTIVITIES

High school science coach (Summer 2022)

Assistant instructor for BME 444/544 – Biomedical Instrumentation (Spring 2020)

Grader for ME 335 – Heat Transfer (Fall 2017)

Grader for ME 235 – Thermodynamics I (Spring 2017)
